

Telephone Recording Adaptor Line Connect REC-ADPT-LC

Description:

The Trillium Line Connect Telephone Recording Adaptor allows you to connect your PC or Recording device to your telephone line to record telephone conversations. The adaptor can be easily connected to an analogue telephone line. (See diagram) It is suitable for recording telephone calls when using a standard telephone, handsfree telephone, conference unit or cordless telephone.

The Trillium Recording Adaptor is ideal for recording telephone conversations, for later reference, to

confirm details of the conversation such as; the order quantity, agreed price, name, telephone number, address or credit card details. It is also extremely useful for recording telephone interviews and conference calls for later transcription or minute taking.

It is a valuable training tool, allowing you to record sales and customer service calls for later analysis to enable you to develop appropriate training for Customer Contact staff.

Advantages:

- Easy customer installation and simple to use.
- Inbuilt telephone line cord and parallel socket allows flexible and easy connection.
- Records calls from multiple phones connected to the telephone line.
- High quality recording.
- Connects directly to the telephone line allowing recording of calls on Analogue Telephones, Cordless Telephones and Conference Units.
- Record level control.
- Powered by the telephone line- does not require batteries or Power Adaptor.
- Small and compact.
- Approvals: ACMA  AS/NZS 60950,
